

Homework 04, ISTA-220

Chapter 04, C# Step by Step

Readings

Read chapter 4, pages 87 – 105 in the *C# Step by Step* book.

Discussion Questions

Answer the discussion questions in writing for chapter 4.

1. What are all possible values of a *Boolean expression*?
2. List eight *Boolean operators*.
3. What are the difference in how *short circuiting* works for `&&` and `||`?
4. Look at the list of operators. What operator has the highest precedence? Which has the lowest?
5. In an *if* or *else* construction using multiple lines of code, what effect does the use of curly braces have?
6. In a *switch* statement, what happens if you omit *break*?
